AUTO DOOR QUOTATION

To,

(Quotation Valid only 1Month)

**The Principal
SSPM College Of, Harkul
Tal – Kankavli, Dist -Sindhudurg**

Dear Sir,

Sub :- “Installation of passenger elevator for your prestigious Project at [kankavli](#)

Thank you for the opportunity to provide a proposal for the supply and installation of an elevator at your prestigious project.

We have successfully installed a number of elevators in Mumbai. They will speak for own experience and expertise in this field. We are well equipped with necessary infrastructures, technical manpower and modern instruments.

Salient Features :-

- Reasonable cost
- Maximum safety and quality
- Prompt after sales service

We shall be grateful if you give us an opportunity to prove our know how in elevator installation. We are confident that you will find our proposal acceptable. If you have any queries, please do not hesitate to contact us.

We thank you once again for the interest shown by you in our company and look forward to receiving your values order.

Yours Sincerely

For Poonam Elevators.

BUILDERS SCOPE OF WORKS

1. The machine room should be bigger than the lift shaft as shown in the drawing with good cross ventilation for the equipment. The windows should have prevent rainwater from entering into the machine room provided with louver or with weather shade.
2. Suitable access to the machine room should be provided as per the I.S.I. code and the Bombay Lift Act. The dimension for such access is shown in the drawing.
3. a) Independent 3 phase 4 wire 415 volts power supply to the machine room main switch and independent 230 volts power supply to the machine room main switch for each lift of adequate capacity coming directly, from the meter board separate two earthing wires to be provided for testing and putting the lift in working condition.
3. b) 230 volts light points, along with a 5 pin plug and switch to be provided in hoistway.
3. c) A light point & a 5 pin plug point should also be provided in the lift pit and the machine room as per the Bombay Lift Act.
3. d) Client to provided Earth Leakage Circuit Breaker (ELCB) for lift duty motors as per I. E. Rule 61 A
3. e) E.L.C.B. to be connected to the 415 volts main line in the lift machine room, in front of the 415 volts iron clad 3 phase main switch,
3. f) Supply Meter required 3 phase , 4 wire type of adequate capacity.
3. g) 415 volts and 230 volts main lines to be provided in armoured cable through lift shaft only.
4. It is very important to maintain the plumb line of the construction from top to bottom of the lift shaft specially on front side of landing wall.
5. All door frames must be exactly in plumb line and flush and above the other and square with the lift shaft also internal dimensions of door frames should be maintained exactly to our requirements.
6. Pocket holes for car and counter weight guide brackets and landing push button boxes as per marking given by our erector be provided.
7. To cast machine room foundation as per drawing and pit buffers as required by our erector at site.
8. The machine room slab to be heavily reinforced to take the dead load and corresponding impact load.
9. A suitable dry and safe room for storing materials and tools should be given before starting and up to the completion of erection
10. Min. Ø16 mm hook to be provided strong enough to withstand load of 1000 Kgs. at the above diagonal centre of the machine.
11. Clients to ensure that no service pipes, ventilation ducts, electrical conduits, etc. inside the elevator shaft and machine room other than those for the lift.
12. Safety barriers in front of all well openings during lift installation to prevent site personnel going into the left well for safety and security reason.
13. Provide dry pit adequately reinforced and waterproof.
14. Furnish and erect the required scaffolding to commence installation.
15. Client to provide an area for adequate store room probably near the elevator shaft with an area of at least 20sq. meter [5m x 4m]
